

ReSound ONE

Feel free to call

We have made it more convenient than ever to stay in touch with the people in your life. Now you can enjoy hands-free phone and FaceTime calls for iPhone and iPad*, using state-of-the-art streaming technology.

Use ReSound ONE™ as a wireless headset to take calls and talk without needing to hold the iPhone or iPad. Just tap the button on your hearing aids to answer a call and get the call streamed directly to your ears.

You can multitask while talking and free up your hands for other activities. With lower battery consumption, you have the power to keep on talking all day.

CLEAR TWO-WAY DIALOGUE

- When you talk, the ReSound ONE microphones pick up and transfer your voice to the caller.
- When you listen, iPhone and iPad send the caller's voice back to the hearing aids and your ears.

HOW TO GET HANDS-FREE CALLS

If you currently use ReSound ONE, your hearing care professional can upgrade you to this feature with a quick fitting software update. They are ready to hear from you.

If you haven't got a ReSound ONE yet, contact your hearing care professional to find out more about ReSound ONE and hands-free calls.

Made for
iPhone | iPad | iPod

Welcome every call

No matter your preferences or lifestyle, ReSound has your calling needs covered. From the new hands-free calls to the following great options, choose the way you like to call and have conversations with confidence.

EASY VIDEO CALLS

Seeing and talking to loved ones online is more important than ever, and visual cues help with lip-reading. Use your ReSound hearing aids to FaceTime family and friends from your iPhone or iPad, and even have a video consultation with your hearing care professional, with the natural sound of their voices streamed directly to your ears.

EFFORTLESS CALLS WITHOUT STREAMING

Easily enjoy non-streamed phone calls from fixed, cordless or mobile phones. Hold your phone normally close to your ear and ReSound ONE with M&RIE (Microphone & Receiver-In-Ear design) will find the 'sweet spot' for collecting sound. The extra microphone in the ear picks up conversations clearly without whistling sounds.

Users found it easy to position their phone to benefit from our most natural sound and would recommend it to others.

Experience ReSound ONE and feel free to call
